AutoCAD for mobile devices was released in 2009 and in the same year AutoCAD Mobile was released. Autodesk Revit, a computer-aided design and construction (CAD/CAM) software application, was released in 2008. Autodesk's also offers the PlumbCenter® platform for the integration of physical design tools and data into AutoCAD and the ConstructionCenter® for field-based construction design. Autodesk's current CEO is Andrew Anagnost. Autodesk's Executive Vice President is Steve Saunders. Autodesk Autodesk AutoCAD is a computer-aided design (CAD) and drafting software application. Developed and marketed by Autodesk, AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was

introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. AutoCAD is also available as mobile and web apps. Autodesk was formed in 1982, with Autodesk AutoCAD as its flagship product. Raster formats AutoCAD natively supports several raster file formats. The following are the raster file formats that can be used by users: AutoCAD DXF (design exchange format) DXF (design exchange format) and DXF (design exchange format) DWG, DWF A simple drawing can be exported in the following types of formats: PDF PostScript EPS AutoCAD's DXF is not an ASCII file format but more like a file format in that it has header and trailer lines of text. New Cancer Epidemiology in Korea - Overview. Cancer is the second leading cause of death worldwide, and its incidence rates are rapidly increasing in Korea. Based on an increase of the number of newly diagnosed cancer patients in 2011 compared to 2008, the total number of new cancer cases in 2012 was estimated to be about 450,000. In 2012, the estimated age-adjusted cancer incidence rate was 211.9 per 100,000 people, accounting for 14.7% of total mortality and ranking second among the causes of death. Cancer incidence rates were higher in men than in women, and the number of cases increased every year for the

last five years. Although the increase of the number of cancer patients was due to the aging of the population, the standardized mortality rate decreased due to an increase of the age-adjusted mortality rate. Among the 26 cancers, stomach cancer incidence was the highest in both men and women, followed by lung cancer, liver cancer, colon and rectal cancer, and cervical cancer. The incidence of breast cancer increased steadily for the last 20 years, as a result of the screening program for breast cancer. However, the incidence rate of prostate cancer decreased. Although there were some changes in the treatment and prognosis of cancer, the 5-year survival rate was 64.5%. Although Korea has good management of cancer based on the experience of cancer registries in Europe and the USA, it has some characteristic differences from other countries in the world.Q: Is it possible to create a recursive object with dynamic type?
