As a first step to developing a mucosal repair system for use in dentistry, we have successfully cultured human oral mucosal epithelial cells using a new culture system. We used a polycarbonate membrane cell culture insert which we modified by coating the bottom with fibronectin (FN) and the top with collagen type I. After seeding the oral mucosal cells on the modified inserts, and observing them for 20 days, we found that the cultured cells have an epithelial morphology and express characteristic epithelial markers. The cultured oral mucosal cells also displayed high mitotic activity, indicating the successful growth of the cultured cells. Thus, this cell culture system can be used as a simple, biocompatible method for the cultivation and handling of oral mucosal epithelial cells.Q: Count of items in a list in R I'm trying to find the number of words in a list of texts. Markup Assist: Save time with the markup assist tool by enabling it automatically, on a per-page basis, at any time you're editing a drawing. Refresh the ribbon in a Drawing View or Screen View to get the updated new look. Global Revoke: With just a click, you can revoke permissions from all users. Multi-layers feature for geometric objects: Create dynamic geometry as a multipart geometric object, using layers and stacking contexts. (video: 1:30 min.) You can now associate specific attributes to specific geometric objects. New tools for 3D-modeling and Animation: Explore better ways to create geometry with the new Multi-Edge and Multi-Vertex tools. The new Multi-Edge tool creates quadrilaterals, pentagons, hexagons, and octagons by joining edges, edges, edges, edges, or edge loops. Use the new Multi-Vertex tool to generate polygons, polygonal curves, polygons, or polygonal curves by inserting vertexes. The new multi-edge and multi-vertex tools are part of the new Multi-edge and Multi-vertex Mesh feature that adds vertex and edge capability. (video: 1:30 min.) The new Multi-edge tool is available in Drawing View only. Explore new tools for 3D-modeling and Animation: Multi-view with Move and Rotate: A new feature in the workplane toolkit enables you to work with multiple orthogonal views in a drawing, and then scale and move those views as a single unit. Move by layer with Snap to Layer: You can easily move multiple drawing objects simultaneously. Simply hold the [Shift] key and drag to snap to layers. New tool for B-rep editing: Edit and move non-manifold edges and faces for meshes and 3D models. Create a physical model of any 2D design with the new BRepMesh command. New tools for 3D-modeling and Animation: Simulate animations of 3D-modeled objects. New Face Creation tools: Create surface, solid, and wireframe faces for 3D models. Edit surface, solid, and wireframe faces on the model. New 3D-modeling command for creating complex shapes
