I want to determine the number of solutions for \$1\$ is either \$1\$ or \$2\$, \$2\$ is either \$1\$ or \$2\$, \$3\$ is either \$1\$ or \$2\$, \$4\$ is either \$1\$ or \$2\$. But there are \$9\$ positions where I can insert \$1\$ or \$2\$, so the answer is \$9\$. Can someone verify this? A: We will count them one by one and add. Import and edit objects from MPP files for enhanced accuracy. Easily import and edit design information for MPP files including table layout. (video: 1:07 min.) Markup Import and Markup Assist creates a drawing update script in the.scr format that users can edit and review before submitting to the CAD Manager. Wireframing with Fabula: Explore the options for building a design by using an intuitive drag-and-drop canvas and interface. A streamlined interface uses icons to efficiently manipulate a design, allowing you to create wireframes in minutes. (video: 1:26 min.) Design Review: Quickly share and incorporate feedback into a design. (video: 1:05 min.) Fabula's intuitive interface supports easy sharing of designs with others. Easily share designs via email, chat, or file transfer with Fabula. A new content and context tab displays tools in context and makes navigation easier. Click on the context tab to access and use tools grouped by your design context, such as Civil 3D, AutoCAD MEP, and Primavera P6. Object Interaction: Edit a design interactively, without the need for AutoCAD MEP. Create editing tools that automatically reflect changes made in the underlying design, no matter the application. (video: 1:22 min.) Allows you to effortlessly switch between design modes using the Move function. (video: 1:01 min.) Streamline your design process with new command shortcuts, including Control+C and Control+V. These shortcuts replace the C and V commands, respectively. Control+C creates a copy of an existing object, and Control+V pastes the object to a new location. (video: 1:04 min.) If your favorite command can be used in multiple design applications, you can apply the command as a keyboard shortcut. This is easy with the Keyboard Shortcut dialog box. The keyboard shortcut for each command can be changed in the Keyboard Shortcut dialog box. (video: 1:04 min.) Keyboard Shortcut (Control-C): Creates a copy of an existing object. Keyboard Shortcut (Control-V): Pastes the object to a new location. Keyboard Shortcut (Control+C): Creates a copy of an existing object.
