**Portable HFS - HTTP File Server Crack +**

\*\*\*\*\* HTTP File Server is a practical, user-friendly and intuitive software utility that comes in handy for users who need to share files over the Internet in a secure way. The application provides you with fully customizable settings and enables you to easily find out if your server does work on the Internet by performing a test which involves network activity, change the speed limit and the maximum connections allowed on your HTTP server, as well as to delete or rename partial uploads. The user interface is clean and displays basic details about the connection status and all the uploaded files. You can drag and drop the files directly into the main window or use the context menu from where you can easily add a new empty folder as well. Moreover, Portable HFS - HTTP File Server Serial Key enables you to set your own IP address you want to be used each time you upload or download files, set up the virtual file system, integrate the application in the shell context menu, change the port and input comment on file addition. The main window of the utility comes with two different modes you can switch between, namely the 'Expert' and the 'Easy' mode. The difference is that when changing to Expert mode, you are able to preview the Internet speed and the server traffic. Another feature that Portable HFS - HTTP File Server comes with is the 'Open in browser' option which is located on the upper side of the menu. You are able to preview all the uploaded files and archive them using a web browser without closing the application. Moreover, the utility allows you to accept connections only from users you know, ban specific clients and even pause their downloads. All in all, you can share your documents and get notified each time a user wants to download your files. Since it is the portable version of HFS - HTTP File Server, no installation is required and you can run the program directly from a removable device, without worrying that the system registry is affected in any way. All things considered, Portable HFS - HTTP File Server proves to be a reliable software utility that gives you a hand when it comes to sharing your files over the Internet with your friends. Its intuitive layout makes it an ideal solution for professionals and beginners alike. \*\*\*\*\* 09e8f5149f
