The impact of the intraocular lens haptic design on refractive outcomes in cataract surgery: a randomized prospective trial. To evaluate the impact of the intraocular lens (IOL) haptic design on visual outcomes and predictability of refraction after cataract surgery. It has been known that the IOL haptic design may affect the visual outcome after cataract surgery, but there has been no study about its influence on the refractive outcome. This prospective randomized clinical trial randomized 40 eyes of 40 patients who underwent cataract surgery into two groups. Group 1 (straight IOL group) had an IOL with an open loop haptic design (n = 20), whereas group 2 (closed loop haptic design group) had an IOL with a closed loop haptic design (n = 20). The outcome measures included best corrected visual acuity (BCVA), uncorrected visual acuity (U 09e8f5149f

## Quick Calc Full Version Free (Updated 2022)

Quick Calc is a new, very fast, and easy to use Quick 'n Easy Calculator for Windows. The program does away with the need to have a precision mouse (plenty of programs do that) and it requires the use of the keyboard only. No work is required to change the default settings. Simply open the program, press the number keys and the calculations start immediately. You can increase or decrease the field size to make it suit your needs. The program can easily calculate double, triple, and quadruple precision numbers and in fact there is absolutely no need to type the decimal points at the end of the numbers. You can also perform logarithm and square root operations. Just press the right arrow key and there you have it. You can even calculate a simple differentiation or integral along with the other mathematical operations (which are included in the list of commonly-used functions). A multiple-step pie-chart is displayed to show you how your calculations are being performed (you can even pause the process for a more detailed view). To start your calculations, type the required calculation in the window caption box and then press Enter. To quit the program, simply press the 'ESC' key on the keyboard. Features:

- Calculator, Conversion, Root, Integration, Log and Trigonometric calculations.
- Precision can be defined for all functions.
- Text to number conversion.
- Function list with all the most commonly used functions.
- Works with all the formats of numbers such as integers, decimals, dates and time.
- Uses the fractional part of the number as a decimal point.
- Calculation can be done with a large range of precision.
- Conversion of thousands, hundreds and even millions of units.
- Copies the tape to the clipboard.
- Can be run directly from the desktop icon.
- Ready for Microsoft 95/98/ME, NT and 2000.
- Requires no installation. Just launch from any location.
- Does not provide the copyright information.
- No user registration required.
- Multiple languages available - English, French, German, Spanish, Italian, Russian, Turkish, Korean, Japanese, Chinese, Ukrainian, Russian and Arabic (in Arabic format).
- The program does not require any icon or short cut keys - just press the number keys and the calculations begin.
- Allows you to choose the type of numbers to be displayed - integers, decimals, fractions
