Merlin Autodesk has developed a few other products and services designed to integrate different CAD applications. Many of them are no longer actively supported, and are no longer updated for new versions of AutoCAD. In 2012, Autodesk launched a project called Merlin. Merlin provides direct communications between AutoCAD and other third-party applications, such as 3ds Max, Maya, SolidWorks, and more. Merlin is designed to allow users to link and share work between different applications, and thus take advantage of the features and functionality of other applications. Since 2013, Autodesk is no longer supporting the service. However, Merlin continues to be accessible to all registered customers. The development of new molecules for human therapy often involves the addition of nanoparticulate carriers to increase drug efficacy and the transport of small molecule drugs into the respiratory tract. The success of a nanoparticulate system relies on the molecular properties of the carrier material to interact with the biological environment.
