An absolute beginner should spend some time just learning the layers in Photoshop and then experimenting with very simple editing tasks in Photoshop before undertaking any complex or time-consuming editing. Because users can choose to edit only one layer or manipulate many layers simultaneously, you can spend hours working on a single adjustment layer. In fact, if you use a tablet instead of a mouse, you can work with dozens of layers simultaneously. Older versions of Photoshop had problems with stability and crashed from time to time, but Photoshop CS2 (available as a free upgrade) has totally revamped the software, making it even more user-friendly and stable. In fact, the

new interface makes Photoshop more user-friendly than the very newest Photoshop releases. (Chapter 10 addresses the new interface in more detail.)

Oops! Here is something you may want to have for your collection: this is video of "The Lost Boys" with "The Greatest Movie Ever Sold" as the theme song. This YouTube video is from November of 2005 and was recorded at the Continental Boardwalk in Ocean City, Maryland. You might recall that The Greatest Movie Ever Sold (or The Greatest Film Ever Sold) is a family boardgame aimed at children ages 8 and up. The game is about "saving movies from being lost." Just when I think I've seen everything... The game was created in 1999 by brothers Miles and David Mallah who wanted to buy their father's movie collection and save it from being lost to time. While shopping for old films to recover from a video store, they found that their father had acquired some rare films by mistake. That's when it hit them that their family's valuable film collection was getting lost. Watch the video of the promotional video: Miles and David began selling their imported films off to collectors and set up a website: The Greatest Movie Ever Sold. Since 1999 the brothers have been expanding their cult film distribution enterprise.

They can now be found at American International Pictures, Flicker Alley, Flicker Alley 2000, Scream Factory, Arrow Video, and now Green Integer. The Greatest Movie Ever Sold: Hanging By A Thread

The game in its pre-Easter "Closed" version

The game in its current Post-Easter version

You'll notice in the first picture that the production designers change the set between the Pre-Easter and Post-Easter designs. The new cards include mini-puzzles, tricky clues, puzzles, and more. However, what really takes it to the next level is the striking visual style they have built into the design. The Post-Easter edition changes the colour of the cards, adds the new redesigned character set, and the other visual design elements match the post-Easter edition of the
