Let's say I have this csv file data_file.csv, and I want to convert this file into a pandas dataframe such that after each row, there will be a new seed for np.random. So in each time I run the script, I will get a different set of random numbers. 1, 10 2, 20 3, 30 4, 40 5, 50 How can I do this? I'm using Python 3.5. A: In pandas, You can use random seed. It first set seed then generate random numbers. Example: import numpy as np import pandas as pd import datetime np.random.seed(datetime.datetime.today().strftime("%Y%m%d%H%M%S")) arr = np.random.randint(1,5,5) #print(arr) pd.DataFrame({'Row':[1,2,3,4,5]}) Result: Row 0 3 1 1 2 3 3 2 4 5 The Defence Science and Technology Organisation is racing to develop a mobile version 3da54e8ca3
