LabelDirect For SATO [March-2022]

What makes LabelDirect different? 1. Quick and Easy to use - LabelDirect is the easiest to use labels package on the market. It was designed from scratch as a labels package in response to Image's 25+ years of experience in the labelling industry.

LabelDirect is designed to deliver best results for the widest possible range of label applications - heavy and light printing, image alignment, flexible orientation and so on. It is universal and will work effectively on LabelPrinters, News, Gel, Fusing and Sato printers. 2. Vectorised - LabelDirect runs on a dedicated platform that intelligently vectorises your image files and has extensive functionality for colour and b/w separation; you'll be impressed at how crisp and clean your labels look. 3.

Commercial grade print fonts - Use commercial grade print fonts created by Authorware or other highly regarded font technology companies. LabelDirect provides a selection of commercial grade fonts to use on your labels. 4. Print directly to SATO specific interfaces - Some printers support GDS interface including SATO 3D, SATO DDF and proprietary. They allow printing directly to SATO printers. 5. Our labels come fitted with the correct SATO fonts - Print a label with LabelDirect and you can set it up to correctly display the text that you enter at the text position. 6. Save time and money - You can use the MySATO page to keep track of the label numbers and characteristics that your printer supports. 7. Tag your printouts - A spreadsheet of your client information will allow you to track the origin of your label printouts and give you peace of mind. 8. Print directly from a word processor - LabelDirect supports output to files directly from Microsoft Word and WordPerfect.
