Q: ASP.NET MVC3 - ModelState error on second request I have the following scenario: User post request. Controller returns view. View binds FormCollection to model. Controller performs some action. User sends second request. Now, here is the problem: I send the second request, and I get an error saying ModelState is invalid because my controller is invalid (on step 6). Is there any way to completely ignore this error and reload model from the database? A: I do this, but it's not ideal: // dont' forget to map your model ViewData.Model = new YourModel (); and (inside controller) ModelState.Clear(); It doesn't reload the model from the database, but it ensures the

Infinity Stone is an epic stone block construction game where the goal is to create a space empire, with the most blocks possible. Experience the forest in this free old-school construction game, starting with an ocean and a single square block. Build up a village with customizable fences, ponds and trails to reach space, and get the most blocks possible. Expand your building empire, fighting with other players in real-time for the best possible colony. Explore randomly generated, procedurally generated worlds, create a house, and build your own nation! Add bonuses and powerups, upgrade your property, and complete quests, like a blockbuilding puzzle-game. Maximise your life in this beautiful strategy puzzle game! Your starting point is in a village, where you must complete 8 quests to unlock the highest scoring worlds and finish the game. Once the first quest is unlocked, you can travel to any of the worlds and try to complete the quests there. The time limit to complete the quests is 10 hours, and you are restricted to a world from where you are. Each quest unlocks a new world, and also opens up new kinds of quests. Build your home and city by the ocean, add the most houses, farms and game objects and make your city as big and as beautiful as possible. Expand your empire, fight for the best spots in your city, use your armies to make your city look more fancy and awesome. Explore randomly generated, procedurally generated worlds, create a house, and build your own nation! You can place villas, farms and game objects and make a home in an environment of beautiful cities, with a lot of houses. Build your own empire in this simple city builder. Start with a single house in a random world. Build up a village, add houses, farms and monuments. Use the game object "Mine" to dig underground to find gold. Create your own army and fight against the other players' armies. Complete quests, earn bonus points and victory points. A real puzzle game without any 'time-limit'. Construct your own world with a series of bricks, with square and round shapes. Build tall towers by tapping bricks that are close to each other. Use the game objects "Mine" and "Crop" to dig underground to collect gold. Each level has multiple paths to choose from, you can take all the paths to get the maximum gold.

What's new in Eight Stones:

Of Legends 2.0! With GoodmanGames' of course (twinpatch we are now working on an update to fix existing and issue with the reworked game logic. The update already started according to our planed schedule but will be pushed back so it's understandable if we haven't activated this new patch on our website yet. Super Mech League of Legend 2.0 Hello player, the guys here at GoodmanGames are already working on a complete revamp of the league. We want you to play a great league again but experience a league with even better good and fun. In fact the 2.0 version already released for you will be more than the most requested revamp version so far. Read on to find out more... New Features and Changes This update will take longer than usual since we had to work on our new league engine. It will take a little more time than expected but is worth the wait. Competitive mode now has some new formats We changed the existing competitive mode it's now not as smooth for casual players to play since we had issues fixing hidden bugs that can lead to results you may not expect. There isn't a way for players to switch to Competitive mode in League or Champions mode (yet at least). If you want to test the competitive mode enter from our website in a game or just join a game with a friend if you want to switch to competitive mode in League or Champions mode. League Management Editing the league is now almost the same as before. You had the option to make only teams, name them or even edit their names. You won't be able to do the same with the league in the future. You had the option to map a game. We now have a new system. Just find a game to start and finish it. If you have problems or if you just want to talk more we can always be reached via our discord server (discord.gg with the username GoodmanGames: (The Dev Team will now make sure that the league follows the rules of the game. The character cap in League will be at 30 slots. If there are games with more than

Let's play, come on!"The present invention relates to a variable speed drive for a rotating electrical machine, and particularly relates to a variable speed drive that makes it possible to change a generated electrical power with a simple construction. A variable speed drive for a rotating electrical machine, which is disclosed by Japanese patent application publication number 2-266532, includes an input shaft, an output shaft, a reversible generator, and a variable speed rotational power transfer element. The input shaft is rotated by an external power source and the output shaft is rotated by the rotation of the input shaft. The output shaft includes a plurality of planetary gear sets, planetary gear sets are each connected to a neutral rotational element, and the rotational element is connected to the variable speed rotational power transfer element. The variable speed rotational power transfer element is comprised of a planetary carrier, an output sun gear, a ring gear, a carrier gear, and a planet gear that is rotationally supported by an arm. The carrier gear is connected to a sun gear of the planetary gear set to be in mesh with the sun gear. The carrier gear is rotationally held to a bearing rod that is secured to the variable speed rotational power transfer element. The output sun gear is connected to an end of the bearing rod. A ring gear of the planetary gear set is connected to the planetary carrier. An output shaft rotationally supported by a bearing is mounted to an end of the planetary carrier. The above described variable speed rotational power transfer element is rotated by the rotation of the input shaft. The rotation of the variable speed rotational power transfer element rotates the planetary carrier to rotate the output shaft. The rotation of the output shaft rotates the external electrical
