"We've worked extremely hard to create the most authentic and exciting football experience on console yet, using groundbreaking technical innovations such as "HyperMotion Technology" and the most up-to-date physics engine," said FIFA franchise executive producer, Peter Melville. "By combining cutting-edge tech and a new-found focus on player emotion and on-field gameplay, we hope to create the most realistic football experience possible." "We've worked incredibly hard to ensure we've made the most authentic football game ever. The focus is on on-field gameplay and making football as real and emotional as possible. This title is built upon that." Gameplay FIFA 22 introduces "HyperMotion Technology," developed exclusively for the Xbox One and PC, which uses motion capture data from FIFA 22 players playing a complete, high-intensity football match. Real-life player movements, tackles, aerial duels and on-ball actions are captured and the data is used to power the gameplay. FIFA 20 introduced a host of new gameplay mechanics based on player instincts. In FIFA 22, the new control scheme and gameplay mechanics are designed to improve the player experience and closer reflect real-life football. FIFA Real Player Motion Technology FIFA 22 introduces "Real Player Motion" technology, a deep integration of player-articulated animations and motion capture data which is used to animate 11 different player attributes - such as punch, pass, head-on, off-ball and more - to each player from the vast collection of real-life footage captured from a best-of-class professional football match. Additionally, a new Player Intelligence system analyzes the play around the player and makes automated adjustments to player attributes, such as positioning and release timing, based on the current environment and the position of the player. FIFA Human Intelligence Engine The FIFA 22 engine has been created to allow us to accurately simulate a broad range of interactions between players on the pitch and to bring a level of authenticity to the sport that has previously been impossible on console. By combining sophisticated physics and the latest in motion capture technology, the game is packed with more player intelligence than ever before, with the reactions of players when playing in different situations all being very lifelike. FIFA Ultimate Team This year's Ultimate Team, will include over 1,500 new player cards. Over 400 of these new cards are based upon
