The gameplay in FIFA is more intuitive. Positioning and acceleration are more accurately detected than ever before. Players react faster and more naturally to ball changes, and a new intelligent AI system makes smarter decisions. Shot accuracy and ball control are more relevant than ever. With FIFA's "Pass and Control" system, players can take their shots, dribble past opponents and take them on dribble freely. The AI system is more intelligent and anticipates the next opponent's movement. Players feel more connected to the game and FIFA 22's gameplay feels more authentic than ever before. Overall, these technical improvements are backed up by small changes to the way players interact with their club. New attribute icons have been added for players, such as being more accurate and reliable in off-ball movement. New personalised 'quests' have been added to inspire players to improve individual attributes. These 'quests' will be personalised to reflect the player's characteristics and are tied to attributes in the player's character which need to be improved. These quests will be a constant reminder to improve the player's attributes. Players will be more engaged in and enjoy personalising their characters. The way players interact with their club has been enhanced. Players no longer receive requests to 'Dojo' their clubs, except for specific requests which are personalised to the player and the club. Club requests are no longer available, because clubs want to focus on honing player performance, rather than making them do favours for their club. The managers now have an enhanced role in the game, coaching players and assisting with training. Players will always be more accountable to the manager as a result. FIFA Ultimate Team has added improvements too. A new FIFA Ultimate Team mode has been created. Players will be able to collect and swap 'Emergent Powers' during play. These powers change the rules of the game for a limited time. For example, a 'New Formation' will change the formation for a limited time. Players will collect Emergent Powers and use them to find new ways to dominate play. New cards have been added too, like 'RUMORS' and 'CLUBS.' Rumors will come into play in matches. 'Clubs' will have a longer history of success than other clubs. Players will be able to collect clubs from different eras and even times and use them to create new formations. "The number one goal for

The first iteration of FUT has now entered its third major expansion. FUT 20 includes new sets, legends, and global teams, giving you more ways to customize your Ultimate Team and manage your dynasty. There are also more transfer targets and a closer look at community contributions, and a fresh Leaderboards and Profile areas to explore. Look for FUT to continue to grow with more modes, features, and cards. PES 2016 The ball feels just right in your hands and the shots are precise, allowing you to take control of the entire pitch. The ball path and power are just as accurate as they are in PES. In addition, the players move in a fluid manner that simulates the way in which they really move, more faithfully than ever before. For the first time, you can intuitively use all the skills of a player by simply tapping or tapping and hold on the screen to pass or dribble. In a new Dynamic Moments feature, all shots and free kicks are now affected by the off-ball movement and positioning of the closest opposing players. Before taking a shot or delivering a free kick, you can now see what kind of options are available to you, and the opposing team is shown in more detail to give you a better understanding of where to play the ball. In addition, the formation, strategy and set-up of the opposition have also been enhanced for more realistic match-ups. More to come, PLAYERS PACKAGES In PES 2016, players can be added to your team for free before they are released in the full version of the game. The Virtual Pro feature will allow you to complete a new player's development when they are released, and you will be able to choose one of four options of how to customise them. PESi - PES Online (PS4 exclusive) Create your club, manage your players and compete in official UEFA competitions - all with a friend. PESi brings online gaming to PES. FIFA is a series of association football video games published by Electronic Arts. The latest edition of the series is FIFA 22. It was released on September 28, 2019, in Australia, Europe, and North America. Gameplay FIFA 22 introduces a new performance mode called FIFA Ultimate Team (FUT) Draft, which is based on the Ultimate Team Draft Mode of NFL 2K19. Players with the World Cup Tour Pass can start a career with their favorite national team and earn rewards by winning a series of offline matches. Backing up the gameplay enhancements is a new set of challenges called the One Touch Trials. These feature challenges where, by tapping in and then tapping out, players can execute some special moves that they couldn't before. Gameplay in FIFA is generally cleaner than it has been in the past. An example is that when a player touches the ball, they will stop control, while also receiving a medal to show that they performed a successful tackle. As well, players can be thrown out of a match for diving. For the first time, players are going to be punished for fouls that occur during the 90th minute, with players forced off the pitch. New Real Madrid and Paris Saint-Germain players will be added to the game. Team updates include a larger number of national teams, more than 100 in all, and four-player squads as an option for clubs. In a subtle change, players no longer need to match pace with the rest of the team when taking free kicks. Instead, they can kick the ball into space to create the best angle. FIFA 22 will also have a co-op mode, where players can work together to score goals or defend against attackers. Co-op gameplay features like set pieces, where attackers can play the ball into space for a second pass, and throw-ins, where players can play a ball directly into a spot on the pitch, will be returning in FIFA 2K for the first time ever. FIFA 22 also introduces Champions League Mode, which is the true simulation mode of the series. Players can choose their national team and club to play on a season by season basis. Features One Touch Trials: Play unique challenges by tapping to hit the ball to the open space. Play unique challenges by tapping to hit the ball to the open space. New Performance Mode: Create your own club using new Draft Pick Method. Draft Team Method allows players to select
