In FIFA 22, the ball will react to the players on the field. Players and the ball will react to on-ball situations like through passes. The depth of new ball physics makes balls more unpredictable, resulting in more accurate passes, more varied ball behaviors, and faster, more intuitive gameplay. FIFA 22 introduces "Club Atmosphere," a system that uses in-game data and real-world data from fan-favorites to bring the games, clubs, and stadiums to life. The new system detects crowd noise in-game and applies reverb to the pitch, creating a brand new and immersive experience. New "First Touch" system is a simple and intuitive system that controls how quickly a player plays the ball by reacting to early passes. This provides more control over the timing and trajectory of passes, facilitating an intuitive and realistic gameplay experience. The new system makes passes and crosses more consistent and accurate, and allows for better control of fast attacks and counterattacks. Improved heading physics makes heading the ball more stable and intuitive, from sprinting runs to quick feints. Off-the-ball passes are more effective because of a new, more responsive system that detects more accurate touches. Off-the-ball passes are more accurate than ever, giving players more options to control the ball and improve passing in tough situations. Improved AI logic makes passes more realistic, allowing for more intelligent tactical decisions. Players make more intelligent decisions to win the ball and lead attacks. Improved ball handling physics now makes sprinting runs more effective. Players make more successful and accurate one-on-one runs to beat players off the dribble. FIFA 22 introduces both new and improved "Heading Controls," which include the ability to more easily control the speed and height of headers. The virtual "transfer system" in FIFA 22 allows you to sign players with your real-world money during the Transfer Window, and more players will have a chance to play as their favorite player. A new replay function shows you why a player was signed, is available on the transfer list, and shows what he can do at your club. In FIFA 22, the physical damage system of real players is now reflected in the video game. When a player takes physical damage, his chances of winning or losing in physical duels get lower. In FIFA 22, when you're controlling a player from the bench,

Features Key:

- Hyper Motion Technology
- New Pitch Variations
- New Player Shapes
- New Stadiums
- Enhanced Player Physique Engine
- New Player Movements
- New Tactical Plays
- New Scouting and Vision
- Matchday Experience

Build your Ultimate Team and select the superstars that matter to you. Discover the hottest deals, win weekly and daily prizes, and compete in Club World Cup and Club Playoff qualifiers. Play with more than 30 million players around the world on FIFA Interactive World Cup - start from scratch or defend your previous title in the Pro League or Europe League. FIFA Ultimate Team - PES PES 2012 introduces a series of significant improvements for both the player and the games core gameplay, while also addressing the most important issues in FIFA 11. The goalkeeper in PES 2012 now automatically focuses the ball during free kicks and corner kicks. As well as this, goalkeepers in PES 2012 also perform a more accurate free kick save, preventing shots going off course and giving the goalie more options for saving. Furthermore, the defensive game in PES 2012 is more realistic than ever, with better positioning and improved pass detection. In addition to this, the ball is more physically aware, reacting to player movements and passing patterns. It also performs a better imitation of a man-on-man pass, without having to rely on artificial intelligence. PES 2012 also includes a far superior Attacking AI in both possession and on the break. The AI now sets up plays intelligently before passing it to a teammate, with the aim of scoring, while being aware of the team's numerical advantage, the distance to goal and the opponent's pressing. Lastly, PES 2012 adds a new reactive player AI assistant that mimics the opponent's movement and hides behind players to prevent the striker from hitting the ball. As in FIFA, PES 2012 also includes a 'Button' system, which allows players to change direction instantly during their run. PES 2012 provides enhanced online connectivity with improved player transfers and squad management. Moreover, PES 2012 includes offline League games and the ability to transfer players to rival clubs after the transfer deadline. PES 2012 features a total of 330 licensed players, covering all nationalities and clubs from around the world. Score Attack On-the-ball action and a variety of shooting features have been improved, with actions using all limbs to penetrate the opposition's defence. A more intelligent defence reacts, setting up in a better position to block shots, and the goalkeeper can also be more active from set pieces, making it less predictable and more difficult for the opposing goalkeeper to catch the ball.

What's new in Fifa 22:

- **FIFA WORLD CUP FORMAT**
- **FIFA WORLD CUP**
- **NEW SINGLE CAMERA VIEW**

FIFA (acronym for "Football and Athletic Club of International Football Association", first released in October 1957) is a licensed sports video game series developed by EA Canada and published by Electronic Arts. FIFA is one of the most popular sports video game series in the world, with more than 100 million sales. It is the main franchise of the FIFA series and the franchise's most successful installment to date. FIFA games feature in-depth soccer (football) gameplay with its own unique make-up, and/or leagues and stadiums, additional features such as the ability to play as national teams and create your own player, and online and offline multiplayer gaming modes. FIFA was one of the first videogame franchises to include a "club license" system, which allows players to play matches against other players' club teams on the same or different platforms. Gameplay FIFA delivers authentic soccer action for players of all skill levels. Over 100 teams from all the world's major leagues and numerous international leagues are included in FIFA's game modes. Players can choose from any of more than 40,000 real players from around the world and play up to five players simultaneously in solo, split-screen or online co-op multiplayer. Team management has been expanded with 36 real national teams (16 in standard FIFA, 16 in FIFA Street 4) to choose from, offering new challenges for players looking to challenge themselves. Players can play in more than 180 international stadiums, with the game's engine recreating the natural geometry of these stadiums in ways never possible with previous editions of the game. In-game Challenges FIFA includes more than 80 in-game challenges for beginners and expert players alike. Players can choose from among various game modes to compete for the latest FIFA game awards or can compete against players across a variety of titles to earn special FIFA challenges. Content and Features There are six different game modes in FIFA 22: Coaching (tips, tutorials and advice) Explorer (Create a custom team and build a stadium) Training (create a custom team from scratch with fitness, formation and tactics) Big Moments (make the right play in the big moments) The Journey (show your growth as a player) Pitch Careers (choose from a selection of players you've worked with before to represent you in your career) Demo version of the game is available now via EAS
