National Security Agency's mass surveillance, two Democratic senators announced on Monday. The "Stop Spying on America Act" would prevent the NSA from accessing private records of any Americans and close loopholes that have been exploited by the spy agency to collect the information. ADVERTISEMENT The bill would also limit the agency's access to telecommunications metadata by requiring the FBI to seek a warrant from a court before requesting records. "While the debate about the Administration's surveillance practices rages, it's time we broke the stranglehold that the National Security Agency has on our private information," Sanders said in a statement. "We need to end this practice, not just for our own sake, but to stop its undermining of our democratic system. "I am proud to join Senator Markey

Sorry if it looks like that. A: There's something wrong with your line endings, from the looks of it. From the Wikipedia article you link to: The file is encoded as ISO 8859-1 (Latin-1) with CRLF line endings. (And from your comment, one of the original line endings, a CR, looks to be converted to a space.) Etanercept (TNF- $\alpha$  receptor/Fc fusion protein) in rheumatoid arthritis: a case report. Anti-TNF- $\alpha$  agents are being used with increasing

---

frequency in the treatment of rheumatoid arthritis. The first agent to be investigated was the anti-TNF-alpha agent etanercept. A young, previously well woman, was found to have longstanding seropositive rheumatoid arthritis. Despite methotrexate, prednisone and sulfasalazine, she experienced significant acute reactivation of her arthritis. The patient declined further prednisone or sulfasalazine and was started on etanercept. She has since had a dramatic response to etanercept including resolution of symptoms and significant improvement in physical function as assessed by the HAQ. There have been no side effects related to etanercept. This is the first reported case of etanercept use in Australia and the Southern Hemisphere.

Mixed platforming Today's typical indie game has mixed gameplay. You can say a mixture of running around, shooting things or jumping on things. I say that a pure platforming game should only include two modes: running and jumping. Shooting should be done later or not at all, as a platformer should focus on proper rhythm-based platforming. A pure platformer should balance the momentum based on where you're touching the ground. Every inch you touch the ground must be flat. The momentum is also modified by the turns you're taking. This requires that every platform, wall, and dead end needs to be flat. Every side of

---

every object needs to be flat. In addition, the levels should be large enough to feel limitless. Jumping and running should be done with only a slight amount of momentum or without it at all. Jumping forward should be simple without any up and down movement. Just jumping without any momentum can be done by running with your tongue out. This accomplishes the same basic thing as falling, but the suspension of momentum
