"Without a doubt, isomorph is my favorite game I've played in the last couple of years." - Indie Game Magazine, Top Indie Games of 2012 iObserve is a turn-based strategy game, where one player controls the defenders of the base, and the others the army that's trying to take it over. Taking place in a constantly changing map which can change drastically, the player has to make smart decisions in order to complete their mission. Similar to its predecessor, Cradle of Civilization, isometric, arcade style, turn-based strategy game which is very easy to learn yet hard to master. The game takes place in the era of the late 1930s, where the world is in the middle of the Great Depression. The aim of the game is to capture the enemy's fortress by controlling your soldiers and attacking them. As the current owner of the fortress you have to decide how to collect the needed resources to sustain your army and defend yourself against the enemy that is on his way to capturing the fortress. Pny's journey is driven by a deep, dark mystery: Every 800 years, the souls of the dead rise from their graves in an endless bloody brawl in the city of Pny. A researcher, the player must defend the city from their attacks and help the souls overcome the barriers they encounter. The game features a number of unique mechanics and a deep writing that has been praised by critics. The player takes the role of the craftsman known as The Sun, who in the course of his lifetime builds several pyramids that can attract the souls of the dead to his city. This unlocking comes at a cost, however, and the player's resources - the souls he has attracted to his city - are constantly dwindling. Because of this, it is important that the player carefully considers his decisions, as he can either help the souls overcome obstacles or end up making them more powerful. Death & The Diamond City is a mobile app based on the concept of "Where's Waldo?". Players search their surroundings for a special symbol, after which they have to use that symbol to open the next level. Upon unlocking new levels, players gain access to new puzzles and opportunities. The game consists of several genres, each of which explores a different aspect of creating the world's first fully functioning video game. Included this is a suite of "unusual" mouse control software I created to control the movements of mice while on a keyboard. It's actually meant for delicate purposes. Or for when you're driving a car, so you don't really need a mouse, just so you don't need to use any mouse control software! In short, it's perfectly safe to adjust variables with the mouse. This is an original series of games by writer/game developer Aaron Heine, where you play as a demonic entity trying to save the world! Most of the time, Aaron will sneak his demonic ways into your daily routine, while other times you will be the one looking for him. You play as a demon which spawns in a person's body when it has been slaughtered by other demons. Demons need to suck the very essence of life out of their victims so they can reproduce. If you kill a demon, you will end up alone, a ghost. During this exorcism adventure, you will be able to explore your demonic form and battle other demons, as well as flying demons, people who turn into bats, kids who turn into werewolves, and other bizarre things. Also, over the course of the game, you will learn to control your demon side. The world of the game is inspired by superhero comics, with the demonic version of a superhero, the Demon, playing the role of the hero fighting off the villains. You are given the ability to control your forms at will, which will be used to fight off the villains, along with your special demonic powers. This is not a game where you are fighting for moral values or purity. This is a game where you fight to gather souls. Souls are the life force of humanity and demons need them in order to survive. Demons will try to get their hands on souls, and you are the one who needs to save them. You can't always save everyone, but you can save some. This is all about finding a balance between helping and saving. The game features a fighting system, where you can choose to fight or to be patient. You will have to make strategic decisions throughout your adventure. The demons have their own unique abilities, which you can use in your fight against them. The demons could be taking control of your body, and you need to use all of your powers to fight back. You can use your powers as long as you have enough souls, which will replenish as you battle. You can fight using weapons, including the ability to use your demon's claws to rip open the bodies of the demons you fight. You can climb walls and can climb up others. You can even teleport yourself and others! Demons love to fight, and you will be doing a lot of it in this game. You will have access to many vehicles during your adventures. You can fly, fly up walls,
