This system takes into account such aspects of player movement and fluidity that players would otherwise struggle to emulate manually. In addition, data such as that seen in FIFA 17 is collected by scanning the player's movements on the pitch (“in-game movement scan”) in order to provide authentic player control even when the ball is out of sight. The “co-development” nature of the technology means

that data collected from the game world is fed back into the game engine and adjusted in order to provide the best performance. The introduction of the HyperMotion Engine has already resulted in dramatic changes to the physics, animation and intelligence of players. Calendar View All Calendars is the default. With a whopping 60 million Ultimate Team cards to collect, team up with your friends or battle them for glory in Ultimate Team modes. Combine the experience and ratings from all players in the game to create the ultimate team. Team up with FIFA Ultimate Team veterans to create and customize the ultimate team based on your favorite players or try out new formations and tactics to dominate the game. Online – Play against people all around the world on Xbox Live, PlayStation Network, and PC in FIFA Ultimate Team. Create your dream squad and lead your favorites to glory in tournaments, leagues and other online challenges. Real Player Motion – Take your foot off the brake pedal and make every move matter in more ways than ever. Real Player Motion is built around the assumption that every player on the pitch is a superstar. But even your

main player can get better by imitating the movements of top-level players. The fluid, real-time soccer animations of this console version take your game to the next level, letting you see your player react to the game's many subtle nuances. No other soccer game on the market has had this level of fluid motion. Console Integration – Harness the power of Kinect to play in a completely new way. When the ball comes near the front of the goal, simply point your controller at the position and you will be able to score or make a goal by being the first person to touch the ball. The microphone on the controller will allow you to communicate with your players as you move around the arena. PROPRIETARY TECHNOLOGY A host of new technologies will continue to evolve the world's greatest sport – including first-of-its-kind depth-of-play tracking. With FIFA 22, players will have more control over the action on the pitch, with improved visual feedback, and players will experience a more realistic, authentic and connected

gameplay experience that reflects their skills, speed and instinctive understanding of the sport. Body Ball Physics – The new physics engine based on a new entity-based model is designed to better capture the unpredictable and dynamic nature of real-world collisions. Players will now also better feel the effects of rough and high-speed tackles. Referee Technology – A new set of rules, guidance and tactics to help keep players, coaches and players themselves on the pitch as well as improve the refereeing experience. • Reinforced turning circles. • Added player intelligence to ensure that players conform to the ball's size.
