As a result, the implementation and integration of “HyperMotion Technology” creates more intelligence and accuracy for ball positioning, ball and player movement, and the creation of movement and physics interactions. Further, the “HyperMotion Technology” allows different behaviours to be applied to each player, including the ability to run and sprint. FIFA 22 introduces “Simulation Acceleration,” an algorithmic power to further enhance the player experience, helping to deliver more intelligent and accurate gameplay, more realistic reactions, and better pacing. This is achieved through an intelligent engine algorithm that blends together player anticipation and decision-making, along with conditions of the match. “Simulation Acceleration” enables the player to more accurately react to ball-related and player-related events, as well as more realistically create dramatic moments and decisions in the moment of truth. To improve the visual experience for the millions of players around the world, FIFA 22 introduces a new graphics engine that has been tuned to generate more visual details with increased fidelity and realism. This new engine brings to life an enhanced player model as well as the visualisation of the stadiums and more realistic stadiums. FIFA 22 also includes new visual effects including post-processing, enhanced lighting, reflections, and new damage effects. FIFA 22 also introduces an improved “Real Life Motion System” (RLMS), which captures the movements of the player's limbs in real-time to create a more realistic representation of how they would move in real life. This system allows players to perform actions without the need to keep their entire body in motion. FIFA 22 also includes much-improved goal celebrations. For the first time, players' celebrations are included in-game and can be executed with a variety of movements. Players can now influence the flow of play by making the final action of a goal celebration. FIFA 22 is available for PlayStation®4 computer entertainment system, Xbox One® games and entertainment system and PC. The game is available for purchase on Xbox Live, PlayStation®Network, the FIFACampus.com website and select retailers. GAMEPLAY FEATURES FIFA 22 captures the thrill of the world’s biggest, most authentic football experience; bringing to life the thrill of the Premier League, La Liga, Bundesliga, Serie A, MLS, Eredivisie, Ligue 1, J-League, Super Liga and many

The best coaches win, so start planning your plays now! The Origins of FIFA FIFA is known the world over as the most popular sports gaming franchise, but before it ruled the pitch, it was simply a game from Brazil. When the game was first released in Brazil it was named "Futebol do Ano Novo" (football of the year) and this version was first released on the Brazil regional release and was later released on the North American EA SPORTS label for the following consoles. However, FIFA is now widely known

What's new in Fifa 22:

- **Dual A.I.-controlled teams**
- **Be a part of the Community - Tune into other players' online matches to have your lives changed. It's a simple but powerful way to find and win your next online opponents.**
- **Create your own players using the world’s most popular and realistic Ultimate Team cards. You can even assign contracts and customize each player to your heart’s content - it’s the ultimate toolbox for your successful career.**
- **CTR - Call to Arms - Match the core play style of the world’s best teams. Each new season in FIFA is defined by the teams, style, and tactics that the best clubs in the game are using. Bet on your favourite team to win the match using official in-game odds and win bonuses.**
- **New Level Kit and Opponent Kit styles - It’s never been easier to create an authentic-looking team uniform. Teams can now choose from over 100 different combination ideas based on category, location, and sponsor. Create the perfect look for your team by choosing from an endless number of combinations, and create your own personalised team logo.**
- **Dribbling rules - Players can now no longer use the “heavy touch” rule, which unfairly penalized them by preventing them from successfully connecting with the ball.**
- **Gloves - Players can dribble more easily by equipping a glove or special cup, which in reality requires them to use their shoulder and hip to manoeuvre the ball.**
- **Return to basics - This year’s collection of new player animations lets a player execute a perfect pass or turn in the correct direction more easily, and provide more freedom of movement for players to get around their opponents.**
