What If I... In case of death, I would like to come to this world leaving no regrets, no impressions, no marks, but rather, to discard this world like a worn-out old sweater. What If I... In case of death, I want to feel no pain, and to feel happy. There is only one thing I want to do. Beyond the limits of the End of the World... The story of A-chan and R-chan. In the Ten Years Before Doomsday.[Efficacy of the direct-acting antiviral agents in viral hepatitis C]. The recent use of direct-acting antiviral agents (DAAs) for the treatment of chronic hepatitis C virus (HCV) infection has provided a series of new options for achieving sustained virological response (SVR). All DAAs act on the viral protease by targeting the NS3/4A protease. HCV is a hepatotropic virus with a high genetic heterogeneity. NS5B is a key enzyme involved in the replication of the viral genome. Targeting the viral proteins involved in the viral life-cycle, the DAAs thus act through different mechanisms and escape mechanisms. This review will take into account the currently available DAAs for the treatment of chronic HCV infection.Q: 1st Year Researcher - Do I need to build my own network? I've recently finished my masters degree and I'm looking for a job in academia. I have some social skills but I'm not very good at networking and I have a preference for working in fields unrelated to my masters work. Do I need to build my own network or will it be smart to stick to people I know even if they're not in my field? A: If you look for jobs in academia, you probably will be very successful, just go there and do research. Probably you will be appreciated for your ability to work on an unrelated field. Go and participate on related conferences and workshops. This will build your network. With all this comes the fact that your first job will be to publish your research. But as a graduate student you won't have many options to publish. I guess the solution is to continue doing research until you find the opportunity to publish at a university press. But be aware that after one year of postdoc position you will be very vulnerable. Networking takes time, but it's not a rocket science. As you said, if you have good communication skills

Operation Thunder is a top-down shooter with a tactical twist and destructible walls. Approach situations with a variety of gadgets and guns to overcome any challenge in your way. Fight through 45 handmade levels to save the day. Take on levels however you want to. Take it slow and plan out every move, or go as fast as your trigger finger can take you and adapt on the fly. Operation Thunder follows the story of an agent known as Falcon 1 as he is faced with a larger threat than anything he has faced before. As part of a group of elite soldiers, you will take on levels that will put you against an army of enemies. With each enemy you defeat, you'll get closer to victory, and eventually defeating the man behind it all. Along the way, you may find yourself wondering if the barrel of a gun is the best tool for solving problems. But we can worry about philosophy later, right now you have a job to do. Good luck, Soldier. Operation Thunder is a top-down shooter with a tactical twist and destructible walls. Approach situations with a variety of gadgets and guns to overcome any challenge in your way. What's new:

Review Some of the history behind the story of the digital core game "Nations At War" can be found in the XCOM vs. Warhammer 2 analog core game review. The two games were based on the established characters and world universes from the Warhammer and X-Com series. The alien invasion of our world takes place in the highly detailed Caliphia which was inspired by a very famous chapter in history called the Sassanid Empire. The latest patch of most digital core games, a patch is released at least once every month, was released in October 2015 and contains many changes and improvements. Every playable nation has been updated, new campaign maps, units and mechanics. In the start of 2016, more nations will be available, with the addition of France, Denmark, Russia, Italy and Serbia as well as a free set of the map terrain complete with all the mechanics. The map of the Caliphnia continent. Nations At War: Digital Core Game Choose from 5 playable nations; among the Sassanid Empire, England, the Vatican, Rome and France. The game can be played through Campaign, Warfare, Spaceport, SPionage and Scout missions and the solo Missions Board. The Multiplayer feature allows playing against AI opponents, through a LAN or thru a connectivity feature known as Frontline. The missions are set in the Caliphnia world and inspired from the history of the Sassanid Empire, which is a Persian version of the Empires of Rome and Greece. At the start of the war, several deaths and coup d'etats occurred within the Sassanid world. Armies and their leaders found themselves on one of the many subsepts of the main Sassanid Empire. What's interesting about the game is that it isn't set in a fantasy world, instead, it takes place in the time of history from around 200CE to 500CE, well in the 1970s to the 1980s of today. When compared to the original analog core game, I must say that this game has been greatly improved. It is less buggy and much easier to play. This patch already added in a few improvements to the overall gameplay, especially the Mission interface and the General view. The Missions interface of the game is very easy to navigate and offer great details of the military situation, regardless of which mission you are playing. All the menus and the main information of the game is displayed in graphic detail. Every race has been expanded

Dead Rising is an undead role-playing game developed by Capcom. You play as Nick Ramos, a former photojournalist who gets trapped in Los Perdidos, a desert town controlled by a Private Military Corporation called CNED. The event is called the "Nuke 2.0 Apocalypse." A virus named Nuke has spread throughout the world, and you must survive in a post-apocalyptic wasteland. The government and private military companies have sent in various forces to deal with the Nuke crisis. The game is set in a post-apocalyptic setting where you take on the role of Nick Ramos, a former photojournalist who is captured by a violent private military corporation and forced to live in its detention camp. Every day is hellish – the Nuke virus is slowly killing the world's population, and the corporations have no mercy on the people they find trying to survive. The game offers a variety of missions in which players must travel across Los Perdidos, an undead town controlled by a Private Military Corporation called CNED. Dead Rising is set six months after the Nuke apocalypse has devastated the world. Rich and poor now share the same space, as a zombie-infested wasteland.
