The feed format is I am trying to accomplish: 1. Grab the 'id' of every image in the feed 2. Then I want to check to see if a particular id occurs several times in the 'name' column. I am able to grab the id's of the images fine. But then, how do I go about iterating through the 'name' column where there can be multiple instances of an image? I want to end up with a list of ids that have several instances, along with the name they occur in. For example, one 'name' entry might be: 'Giant Cuddly Poopy Baby Lion (No, I don't have a zoo and I have no animals, I just like cuddly lions with big bellies)'. I want to grab all of the
