The dodos were once the main inhabitants of Madagascar, a group of islands off the coast of Africa. Hunting was their main source of food. Because of the new toys from humans, the dodos became discontented with their lives and life forms. With their parents' urging, the children left the nest to find new homes. However, they were soon stranded in a new world. After years of wandering in the unknown, they reached Europe. From there, they've fled further and further, until they reached Greenland. There, the dodos learn from the Vikings about how to survive in the harsh climate and are supplemented with basic supplies. As a bird, you have the best chance of surviving. But on the other hand, you are not very good at living on your own. Because of this, you'll have to work together with your dodo friends to survive as a group. Dodos to the Rescue! Save the Dodos! We're all familiar with the sad tale of the charming, yet unintelligent Dodo. But now you can prevent their heart-breaking tale of extinction! Does anyone have the snotty, petulant, smartmouthing, I'm-smarter-than-you self-confidence to address what this might be? What is this: We're always using Game Controllers/Devices It's not just Custom Controls It's not just a Skill It's not this Aftermath It's not that we are just the right way to play it I love it, and I know very few who don't. In Super Hot Potato, the Super Hot Potato is on a quest to save his fellow potato kind from imminent doom. Super Hot Potato is racing against the clock on many treacherous screens. With only 4 buttons, Super Potato must navigate his way to the exit by using his chubby little arms and a potato. Super hot potato isn't working for me Posted 10/14/2012 by Dkrfra Bought this game last week. First game I've purchased since 2009 that wasn't an impulse buy. I've opened the box and played about 5 times. After the first 10 or so screens or levels, the game crashes and ends every time I turn the game on. The save point and options are not working either. I've searched for a solution, but they don't seem to be working. I've sent a help request through the steam forum, but no response. I've talked about this to a friend of mine, who even recommended a more powerful computer, but it's not working. I don't understand what could be wrong. Please help! Product Reviews Rated 1 out of 5 by AndrewS from Super Hot Potato is a disaster! I bought this game because it was recommended by the game store, and it does look very good. The problem is that it isn't playable. The camera is horribly zoomed in, you can't move right or left. You just move forward. Right up against the screen so you can't see. I gave up after I got to the third screen, as the save point feature doesn't work. I think there is a problem with the computer the game is running on, since the computer I have is quite powerful. Help? Date published: 2012-10-15 Rated 5 out of 5 by Omega-6 from Super Hot Potato Super squished potato! A fun game that I have played now for 3 hours straight. Controls are very precise and I have found myself pushing the buttons really fast as I lose my patience and time. Camera is also well designed as it allows you to see many more options on your screen and to move your eye in the direction you need it to be. I must admit I have to keep the game at 40FPS because it is so easy to fall asleep. Probably after all of the above I can count on the issue of no more achievements and bugs. Nonetheless, I recommend to anyone. Date published: 2012-10-09
