Synthesis of 1-methyl-9-oxo-10-sulfonamidoacridine derivatives as tubulin assembly inhibitors. Based on the structure of combretastatin A-4, a series of 1-methyl-9-oxo-10-sulfonamidoacridine derivatives (2-10) have been designed and synthesized as tubulin assembly inhibitors.

Among them, compounds 2-3 and 5-6 exhibited growth-inhibitory activity against KB cells ($IC_{50}=0.14-0.15$ microg/mL). The results show that compound 5 could inhibit the proliferation of KB cells with the inhibition rate of 46.6%.

Q: How do I move a div to a different part of the page when hovering an image? I've seen a few examples, but none of them worked for me. I need to move an image when hovering over it, and then to move another div when hovering over it. This means that I have to reposition the div, which I did by setting position: relative. If I don't do this, the div is hidden behind the image. A: In your html, add a class for the div to be moved: And in css: #myDiv { position: relative; } #myDiv.moveMe { position: absolute; top c6a93da74d
