# Hiren's BootCD 16.2 Rebuild All In One Bootable CD

the hiren boot cd team decided to release the product as a legal, fully open-source product with no direct commercial involvement. this approach has seen the hiren boot cd grow into a very popular and widely used cd-based boot disk and the latest hbcd version 16.2 is one of the most popular and highly regarded of this repertoire. to download the latest version of hiren's boot cd 16.2 rebuild all in one bootable cd, click hiren's bootcd. it may take a while to load as the entire hbcd is being rebuilt, but once the boot menu appears, you can choose between the "rebuild hbcd" option to rebuild the entire boot cd from scratch (it takes a while to do, but it is very thorough) or the "rebuild specific section" option to rebuild only the section you wish to update. once the rebuild is complete, you should have a new version of hiren's boot cd. download the new iso file and burn it to a cd or make a bootable usb. when the boot menu appears, you should see an option called "rebuild hbcd" on the left-hand side and if the hbcd is corrupted, clicking that button will rebuild it. hbcd has always been a complex product, so it's always better to consult the manual before you start fiddling with it. however, the default setup should take you to the main menu, which is shown in the following image. the first screen of the menu is the boot menu, which has two options, "rebuild hbcd" and "rebuild specific section". select "rebuild hbcd" if you are updating the entire boot cd or "rebuild specific section" if you are only updating a specific part of the boot cd. 5ec8ef588b
