## Torrent Synthogy Ivory Grand Pianos li Kontakt PORTABLE

the ultimate grand piano collection offers an extraordinary array of grand pianos, including a baldwin, a bluthner and a tippmann, along with several other pianos that aren't featured in the synthogy ivory ii grand piano crack. all of these pianos are represented by a number of samples, and they are all sampled at 70 notes per second to provide a very authentic and realistic impression of the piano. what's more, the collection boasts a large range of controls, with the majority being very easy to set. the synthogy ivory ii grand piano crack offers the same amount of pre-programmed pianos, but all of the pianos are sampled at 80 notes per second. these pianos are a bit more authentic than those sampled at 70 notes per second, but they still have that professional piano sound that you'd expect from a high-quality hardware instrument. the great thing about the synthogy ivory ii grand piano crack is that it also offers additional controls, including various sample layers. these pianos are sampled at both 70 notes per second and 80 notes per second, so they provide you with a good option for generating that authentic and professional sound. synthogys approach to grand piano tone and sustain has been refined to an unprecedented degree, meaning that the instrument is equally suitable for jazz and classical music. the result is a sound the likes of which few instruments can claim to offer. the extra recent refurbishments to the instrument's piano samples were a thankless task, but synthogy's tim auty has turned a difficult task into a masterpiece: in his own words, the pianos are now "the most magnificent pianos in the world." this is evident in the spectacular volume and convincing sustain of the pianos, which are rich enough for jazz and classical recordings, but can also play with a small ensemble.
