Are you planning to buy a new motorcycle but don't know how to choose one? Are you confused between a superbike and a supersport bike? A biker's dilemma, right? If yes, you're not alone. Every biker has a different preference. To know what type of bike you should buy, here is a list of the best and most popular bikes in the world: ► Best Street Bikes ► Best Track Bikes ► Best Road Bikes ► Best Off Road Bikes ► Best Sports Bikes ► Best Off Road Bikes ► Best Street Bikes Every bike has its own style, features, and advantages. It is highly recommended that you keep some things in mind before buying a motorcycle. The following guide will help you choose a motorcycle according to your style, budget, and riding preferences: Street Bikes Street bikes

have a powerful engine and comfortable suspension. They usually have a limited transmission ratio and smaller wheels. ► Supermoto ► Superstock ► Supertouring These bikes are usually ridden on the road. They come with a powerful engine, independent rear suspension, and comfortable suspension. Off-road Bikes Off-road bikes are more suitable for long distance travel. They usually have a powerful engine, independent rear suspension, and comfortable suspension. ► Adventure ► Customization ► Enduro ► Motocross ► Supermoto ► Superstock The following are the basic features of a motorcycle: Engine Engine type - An engine determines the type of the bike. The engine size is usually small and engines with a bigger size usually weigh more than a bike with a small engine. Engine capacity - The number of horsepower of the engine determines the power output of the bike. The power is the most important aspect of the bike. Horsepower - Another factor that can be used to determine the power output of a bike is horsepower. The number of horsepower is measured in horsepower, and one horsepower is equal to 746 watts. Engine Type - There are three different types of engines
