[link]Q: class member makes error CS0029 I have defined a class and my class member is of type List and is being used in a click event handler. Here is my code: public class UploadFiles { public List FileNames; public void Add(string fileName) { FileNames.Add(fileName); } } My code generates error 'CS0029 An object reference is required for the non-static field, method or property'. I am assuming that this is because my class member does not exist at the time of the event handler, but i want to be sure. Here is how i do my code. void add_Button_Click(object sender, RoutedEventArgs e) { string file_Name = add_DropBox_Button.Content as string; //Edit: I have used this before to remove existing data from a different class and it works. fore
