Command line with code snippets For example, to toggle power on or off in the background, just type: xbox:start /a pow.exe or xbox:start /a {POWER} To detect if a disk drive has been ejected from the console, you can use a command line that looks like this: This will show the original name (example, Drive 1) and an initial underscore (" "), which indicates the name has been changed. Using the xbox:excl path with this command will show only the path name, while using xbox:path will show the original and modified paths. Xbox 360 Arcade Controller The Xbox 360 Arcade Controller has a similar controller layout to the Xbox One, with the left and right triggers serving the same purpose as the Xbox One Xbox and A buttons, and the left bumper/back button as the left trigger. The L2 and R2 buttons are mapped to the left and right triggers. The D-pad can be pressed and released by pressing the L2 and R2 buttons, or by using the standard "double-tap" method. The four face buttons on the top face of the controller are the "A" "B" "X" and "Y" buttons, with the "Y" button acting as the Start button. The "A" button is used to access the home menu. While the Xbox 360 Arcade Controller supports the standard six-axis gyroscope in the center of the controller, the Xbox One does not. } #[inline(always)] pub unsafe fn get_max_age(&self) -> u32 { self.0.get() } #[inline(always)] pub unsafe fn set_max_age(&mut self,
