A: Assuming that you mean the quadratic

equation in the form $ax^2+bx+c=0$... Substituting $x=-1$ gives $a+b+c=0$. You can use the quadratic formula to get $x=\frac{-b\pm\sqrt{b^2-4ac}}{2a}$. FIA Formula 2 - Belgian GP 2019 | Autosport magazine Mayo has already tested and qualified in the top five in both races on his debut weekend and says he is looking forward to seeing how the car behaves in race trim. "I feel really positive," he said. "The car feels really good, I love the track and the team - and the car. And, of course, the weather is amazing. "The braking on the first lap was my highlight - we did about 10 laps on the first run and that felt good. The tyres were good, I was able to push without spinning the wheels and I think we're in a good place. "I had a good race in the last round, and I think we can build on that. We need to understand the set-up a bit more, but the engine is really good." Mayo finished ninth and tenth on his debut weekend in the Dallara F2 and says he would like to have another run in the car for the rest of the season. "For sure, we have more work to do," he said. "I
