One of the hottest apps for the iPad right now is Ladders. It stepped into the void left by Adobe's Photoshop iPad app, which they had been so vocal about disappointing users. Ladders is a brilliant app that lets you create your own photoshoots. Ladders lets you take a picture, pair it with some simple filters, then fit it to a ceiling, floor or wall. Then, you want to take it a step further and Ladders lets you match that photo to other photos, allow you to add text and drop it all in the location of your choosing. My favorite feature though is the ability Ladders gives you to export each page as a separate, individual page, just like you'd do in Photoshop.
